-PRESS INFORMATION-

Vibro/Dynamics LLC is the new distribution partner for the MONI LOG® transport data logger of SMT & HYBRID GmbH in the USA

The company SMT & HYBRID GmbH has extended its global distribution network for the MONI LOG® transportation monitoring technology and is pleased to have a new, qualified and strong distribution partner in the USA. The innovative company Vibro/Dynamics LLC (www.vibrodynamics.com) will from now on take care of the sale and distribution of the MONI LOG® products on the US market and will be a qualified consultant for customers on site.

Vibro/Dynamics LLC has been a pathbreaking developer and leading producer of vibration damping and machine assembly systems. Vibro/Dynamics offers its customers high-quality products, an attentive service and technically innovative solutions. For this reason, Vibro/Dynamics LLC unifies the required knowledge and experience in order to guarantee the excellent customer support of SMT & HYBRID GmbH also in the USA.

The company SMT & HYBRID GmbH as provider of innovative, versatilely modifiable transport data loggers has won another strategically important partner for future co-operations and the further extension of the continuously growing business area of the MONI LOG® transport measuring technology.
